

The screenshot shows a code editor interface with a dark theme. The top bar includes tabs for 'File', 'Edit', 'Selection', 'View', 'Go', 'Run', 'Terminal', and 'Help'. The title bar says 'Task 6'. The left sidebar has sections for 'EXPLORER', 'OPEN EDITORS' (with files 'EventDelegation.htm', 'Index.html', and 'EventDelegation2.html'), 'TASK 6' (with files 'EventDelegation.htm', 'EventDelegation2.html', and 'Index.html'), and 'OUTLINE' and 'TIMELINE'.

The main editor area displays the following code:

```
<!DOCTYPE html>
<html lang="en">
<head>
    <meta charset="UTF-8" />
    <meta name="viewport" content="width=device-width, initial-scale=1.0" />
    <title>Event Delegation List</title>
</head>
<body>
    <h1>Todo List</h1>
    <ul id="todoList">
        <li>Buy milk</li>
        <li>Study Js</li>
        <li>Play Badminton</li>
    </ul>
    <button id="add">Add New Item</button>
<script>
    const list = document.getElementById("todoList");
    const addBtn = document.getElementById("add");

    list.addEventListener("click",function(e){
        if(e.target.tagName === "LI") {
            e.target.style.color = "red";
            e.target.style.textDecoration = "line-through";
            alert("you clicked: " + e.target.textContent);
        }
    });

    addBtn.addEventListener("click", function() {
        const li = document.createElement("li");
        li.textContent = "New task added";
        list.appendChild(li);
    });
</script>
</body>
</html>
```

A right-hand panel titled 'Build with Agent' contains the message 'All responses may be inaccurate.' and a link 'Generate Agent Instructions to onboard AI onto your codebase.'

At the bottom, there's a 'SUGGESTED ACTIONS' section with buttons for 'Build Workspace' and 'Show Config', and a preview of the code editor showing the current file.
